

Data & Analytics

Leverage aggregated information to uncover insights that support data-backed decisions

Easy access to reliable data that informs quality analysis is paramount to a high-functioning pretrial agency. The Data & Analytics solution from equivant Pretrial provides broad visibility of both agency-wide and individual caseload details and metrics about release decisions, appearance rates, schedule information, reporting requirements, trends, and more.

Key Features

Predetermined data fields for easy entry

Point-and-click simplicity

Customizable dashboard options for individual personalization

Viewable trends and insights relating to appearance, concurrence, safety, and success

At-a-glance dashboards, queues, and reports

With equivant Pretrial, your agency can:

- Easily view, manage, and track the progress of your pretrial population
- Better inform next steps, recommendations, and decisions relating to every defendant
- Use historical data to view arrest, charge, and release trends
- Eliminate time-wasting spreadsheets with a streamlined data collection and analysis system
- Measure what methods and programs have been most successful in your jurisdiction at reducing FTA rates
- Analyze resource allocation for pretrial processes
- Perform ad hoc data extractions based on your program goals

**Maximize efficiency, consistency, and impartiality
by putting your data to work today.**
