

# Data Interfaces & Integrations

Connect data from multiple sources and disparate systems for a comprehensive view of individuals' information

The data that lives in your system may be easily accessible to all staff members looking for client information. But what about the information that lives in other systems, sources, or departments? In order to stay productive and focused, your team needs the powerful advantage of seamless, comprehensive data integration and sharing.

equivant Supervision and Pretrial's Northpointe Suite offers a robust set of interface and integration capabilities that make all-inclusive data exchange possible. Eliminate double data entries, cumbersome searches across platforms, and outdated procedures by integrating a single-source solution for every piece of data you need. Let our full-service data integration services team take care of the transition on your behalf. Streamline your workflow by confidently relying on a proven partner who delivers a customized solution to meet the unique needs of your agency.

## Key Features

Maintain real-time data connections

Northpointe Suite API allows partner agencies to build agency-specific data interfaces to address the complex and nuanced needs of their stakeholders, justice-involved individuals, and workflows

Connects data across platforms and from different sources or legacy systems

Bring assessments, drug test results, court dates, charge information, and other outside data together into one system

Allow partner agencies to create solutions and data streams that work best for their specific needs

Ability to create new standardized data interfaces

Proven and tested data interfaces with decades of successful outcomes

Dedicated integration team at your disposal to handle beginning-to-end implementation

## With equivalent Supervision and Pretrial, your agency can:

- Seamlessly integrate data from a legacy system, national crime database, county or state system and more
- Save time and streamline processes across departments and teams
- Create easily navigable information hubs for staff, partners, and justice-involved individuals
- Banish information silos and bridge data in a simplified, user-friendly platform
- Access and share data across solutions and agencies
- Rely on an experienced, practitioner-led team for implementation and support

**Bring data, processes, and partners together in one place to optimize systems and workflows.**
