Implementation Services

Confidently hand off beginning-to-end business process review, consulting, software configuration, testing, training, and support so you can stay focused on your day-to-day

With our dedicated equivant Pretrial Implementation Services team, your agency can stay out of the cumbersome details that come with getting your new solutions up and running. You can trust our proven process built on both flexibility and structure to keep track of progress while we manage fully integrating the software into your operations. With our in-depth business analysis and thorough project planning, we ensure you are able to run optimally from the start.

Key Features

- Dedicated project manager to walk you through each step of the implementation process

- Targeted and personalized business analysis, project management, and subsequent training

- Full software configuration and integration with legacy and/or existing systems

- Comprehensive data migration into your new software

- Extensive system testing

- Scalable training program with a "train the trainers" approach

- Ongoing support following final implementation

With equivant Pretrial, your agency can:

- Take advantage of a fully customized approach and a team of committed experts and consultants with decades of industry experience

- Be sure your workflow and procedures will be represented during configuration

- Gain a better understanding of business processes that align with software needs and best practices for moving forward productively

Streamline the entire software implementation process by partnering with equivant Pretrial.
